ALIIKAI

A message from the Owners

“Our passion for adventure has taken us to the far corners of the world. What we’ve discovered from planning our personal travels is that nothing brings a family or friends together like experiencing the wondrous world in comfort and ease. Traveling in a well thought out space with multiple activities and added amenities allows everyone to explore a new destination on their schedule while creating memories that will last a lifetime.

When designing Aliikai, we wanted to create a yacht that brings people together, not only the people you’re traveling with but with those living in the far reaches of Indonesia. Experiencing foreign cultures allows us to see the world from a new perspective and appreciation.

Aliikai is our gift to you.“

Destinations

Voyaging throughout Indonesia

Built for comfort while sailing throughout Indonesia's vast archipelago, Aliikai Voyage brings explorers to the reaches of unique wonders. From the realm of the Komodo dragons, the historic Spice Islands, the underwater kingdom of Raja Ampat, and a front-row seat to the exhilarating Hammerhead shark migration of the Banda Sea.

Aliikai's crew is yours to command with great attention to detail, prepared to tailor the journey to your personal preference. Each cruise satisfies your yearning for adventure while being surrounded by uncomplicated serenity.

Aliikai Voyage provides the perfect blend of a relaxed atmosphere and impeccable service while sailing to exotic wonders to some of the world's most remote and attractive destinations.

A UNESCO World Heritage site, Komodo National Park, is located in the center of the Indonesian archipelago situated between the islands of Sumbawa and Flores. The National Park is home to many unique natural wonders and offers a tapestry of experiences to dazzle and amaze travelers. Walk alongside the legendary Komodo dragons, blissful days on a pink sand beach, and exploring world-class dive sites - Komodo National Park is where Komodo your future memories are created.

Raja Ampat, translated to the “Four Kings“, is located off the tip of Bird’s Head Peninsula in remote New Guinea, Indonesia’s West Papua province.

Best known for its diverse underwater landscapes on the planet, the Raja Ampat archipelago consists of four main islands of Misool, Salawati, Batanta, and Waigeo, surrounded by 1,500 smaller islands.

Situated in the center of the Coral Triangle, Raja Ampat is a prized crown jewel of Indonesia’s famed waters and a global center of marine biodiversity. An epicenter for underwater adventure, the Raja Ampat archipelago is one of Indonesia’s largest protected marine areas and is the world’s richest coral reef ecosystem. Its vibrant waters are home to over 75% of the world’s hard coral species, with new species discovered regularly.

Raja Ampat

Alor

Located at the eastern side of the lesser Sunda Islands, Alor and its neighboring islands of Solor, Pantar, and Lembata offer a wild volcanic landscape with a rich, colorful culture. The Sunda's Islands' abundant and flourishing marine life is attributed to the strong currents flowing through the narrow straits. These currents provide exhilarating drift dives over the pristine coral ecosystem and breathtaking encounters with pelagics, including hammerhead and thresher sharks.

Stunning landscapes await as you travel overland to the lost villages of the Abui tribe, who to this day stay true to their traditional way of life and are also known for their colorful hand-crafted textiles created with techniques passed down through generations.

A cruise through the Alor archipelago is ideal for those who desire an idyllic blend of exhilarating marine adventure and witnessing cultures yet to be altered by tourism.

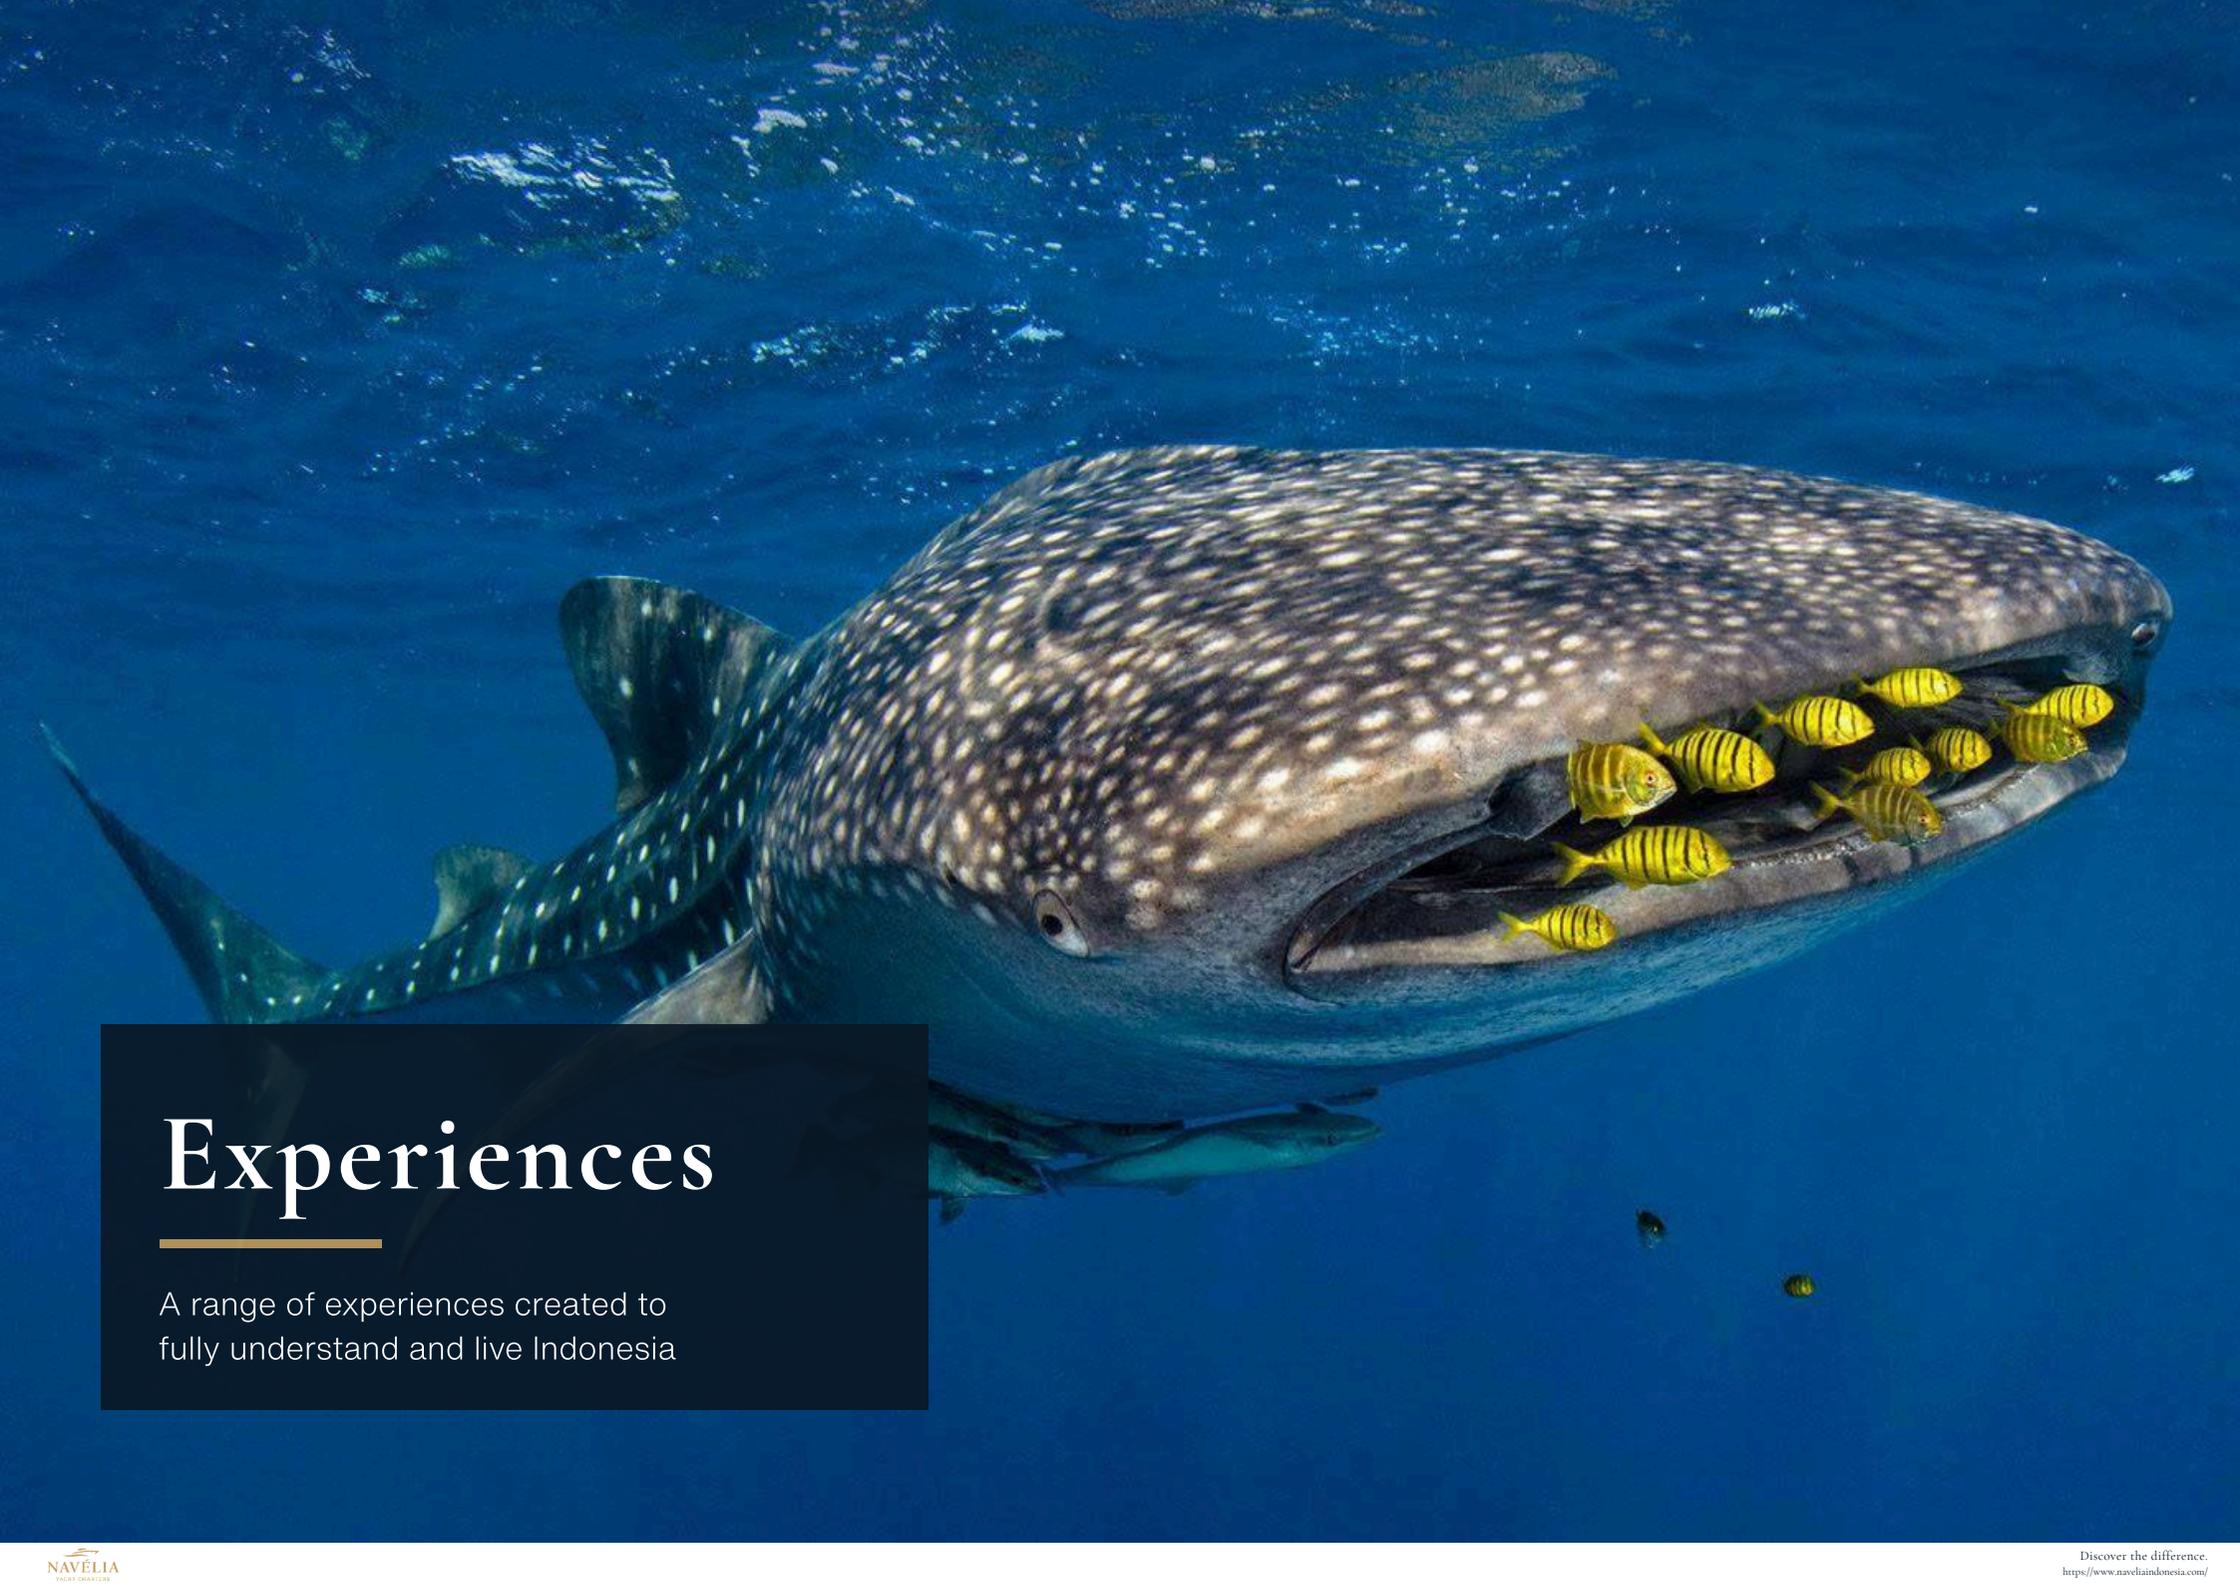

The Forgotten Islands and The Bandas are a chain of small volcanic islands situated between Timor and West Papua. Often referred to as the Southwest Moluccas, these rarely accessible islands offer a rich checkered history that paved the way to our present world. Located in a remote area where diverging currents bringing nutrient-dense water meet, the Forgotten Islands are a diver's Paradise! Nils Desperendum and Terbang are two significant diving hotspots and are best known for the large schools of hammerhead sharks that travel throughout the waters of the Banda Sea. A truly exhilarating and unforgettable dive! These waters are a kaleidoscope of colour and underwater landscapes, offering deep walls, flourishing colourful corals, pinnacles, and volcanic slopes.

Experiences

A range of experiences created to fully understand and live Indonesia

An Aliikai Voyage through Indonesia opens travelers to a unique and exotic world waiting for discovery. From the first step on board, every moment is an opportunity to immerse yourself into the rich experiences that are only found while sailing through this wonderfully diverse country. The Aliikai Voyage offers a wide range of adventures to suit every guest, from the younger guests eager to play in the azure waters to the young at heart waiting to discover a new destination.

Indonesia's untouched rainforests offer a rich biodiverse landscape and are home to numerous unique endemic species only found in this part of the world. One such species is the flamboyant Birds of Paradise found in the eastern island of Papua. Best known for its unique 'dance' mating rituals, the Birds of Paradise put on a spectacular display in an attempt to attract the perfect mate. Other endemic species found on Papua are flightless Southern Cassowary, known for its bright blue neck, hornbill, and deadly claws, and smaller species such as the Victoria Crowned Pigeon or a variety of brightly colored Kingfishers.

Aliikai Voyage will operate Ornithology-focused journeys throughout the year, allowing guests a first-hand look at these one-of-kind creatures.

Culture / Expedition

Indonesia is a diverse nation that includes over 18,000 islands spread over 5,000 km along the equator; many of the islands still hold to their authentic ways, untouched by tourism's hand.

Aliikai Voyage hosts expert-led explorations and culture-focused departures to the rarely visited treasures of Indonesia. We extend in-depth, authentic encounters with indigenous tribes; the legendary Asmat tribe of Papua, the Ikat weavers found in the Lesser Sunda Islands, or the Dayak tribe of South Kalimantan.

Delve into a world long gone when we sail around the Banda Islands, once the world's epicentre of the spice trade, which will deliver its secrets and tales through our team of expert local guides.

Situated in the center of the Coral Triangle, an area known for its concentration of sea life - over 76% of the world's coral species and thousands of different reef fish are flourishing in the brightly colored gardens.

Converging nutrient-rich currents attract larger marine animals such as Whale Sharks, Manta Rays, whales, and sharks that pass through these waters every year as they migrate to warmer waters.

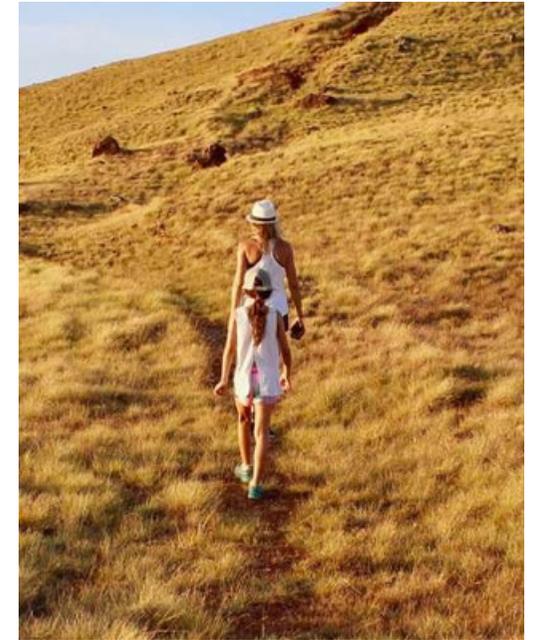

Our expert dive instructors and crew are well versed in Indonesia's abundant waters. Whether you are an experienced diver or prefer snorkeling, we guaranty you will be amazed by the offerings of Indonesia's underwater paradise.

Both options are known as low-impact workouts, and they are also ideal for getting close to nature. Kayak or SUP through the dense mangrove forests to view the wildlife that relies on these ecosystems to survive or get up close to limestone peaks in Raja Ampat while watching black-tipped reef sharks swim by.
